

## Paper Chemicals—Can Canda help?

### Canda International leads way with paper chemicals consulting

Since March, 2007, Canda International has been working to establish a reputation for providing quality consulting on the global paper chemicals business. With over 25 years commercial and technical expertise, Canda International can help to audit specific areas of your business and provide support in making key improvements. Recent projects have involved: new product development for increasing manufacturing capacity; sourcing decisions .....

### Sourcing paper chemicals

Is it best to manufacture or source chemicals? Canda has an extensive network of contacts and will help to identify the best sources of products world-wide.

Recent assignments involved the approval and supply of paper dyes from India; qualifying sources of optical brighteners from China; and identifying quality sources of raw materials for a European manufacturing base.
